Campaign Monitor İntegrated (CMİ) Drupal module
Create and send your Campaign Monitor
e-mail marketing campaign from within Drupal

Drupal   CMİ ⬅➡ APİ   CampaignMonitor

WHY THİS DRUPAL MODULE ?

Create and send your Campaign Monitor e-mail campaigns from within your Drupal website.

ADVANTAGES

No need any more to switch between websites and interfaces. Login twice each time.
No more need to copy and paste your website content (articles, news,...)

FEATURES

- **One interface :** Manage your Campaign Monitor emailmarketing campaign using your Drupal interface.

- **Subscriber lists :** When creating a new campaign, you can directly select your Campaign Monitor subscriber lists.

- **Content Selection :** Create newsletters by selecting existing nodes. Select the articles or news items on your website and send them as a combined newsletter node.

- **Scheduling :** Schedule when your campaign should be sent, directly from within Drupal.

- **Workflow :** Using Drupal roles you can define which Drupal user may create/edit a campaign and which user can send it.

APİ v3

The Campaign Monitor APİ (Application Programming İnterface) makes it easy for developers to add their own layer of awesomenesson top of the Campaign Monitor platform. The CMİ module was made using the latest version (v3) of the Campaign Monitor API.

FUTURE DEVELOPMENT

- **Template selection :** Select a Drupal template that will be used by Campaign Monitor when sending your campaign.

- **Themable Content Selection template files**

- **Campaign Results :** Display part of the CM campaign statistics and results in Drupal

- **Drupal 7.x** release
